

REMARKS

Reconsideration of the Office action mailed on February 6, 2004 in connection with the above-identified patent application is requested in view of the foregoing amendments and the following remarks. With this amendment, applicant has cancelled claims 1-4 without prejudice in order to allow the application to issue. Claims 5-14 were rejected under 35 USC §102(f) and the judicially created doctrine of obviousness type double patenting only; they were not rejected as anticipated or obvious. Accordingly, applicant has amended claim 5 to make it an independent claim, and applicant has addressed the §102(f) and double patenting issues, so claims 5-14 now should be allowable. Applicant has also amended claim 15 to include means-plus-function limitations that distinguish the cited references, as explained below, so that claim should be allowable as well. Applicant has also added new claims 16-24. These specific issues, and other issues raised by the Examiner, are discussed below.

Special Circumstances

The Examiner asked applicant to point out any material information from the co-pending applications listed as parents to the instant application if the criteria for materiality applies and if the examination record provides reason for applicant to believe that the Examiner has not considered such information. Applicant is uncertain what the Examiner is requesting. Applicant has previously identified its applications and believes that identification satisfies its duty of disclosure. Nevertheless, in an attempt to respond to the request, applicant has attached to the end of this document as "Attachment 1" a list of its patent applications and its one Taiwanese patent (the list does not include the national phase filings of the listed PCT application). None of the listed applications have

yet issued as patents. The Examiner is requested to inform applicant if further information concerning any of these applications is needed.

Double Patenting

The Examiner stated: "It should be noted that for the purpose of this office action the below rejections under 35 U.S.C. 101 (double patenting) are being made under the assumption that the applications were not commonly owned at the time of applicant's invention." (Office Action, 2.) Applicant is uncertain what the Examiner means by this statement. The double patenting rejections set forth in the Office Action were made under the judicially created doctrine of obviousness-type double patenting, not under 35 U.S.C. 101, so applicant does not understand why reference was made to that statute. Additionally, as far as applicant is aware, obviousness-type double patenting rejections are made between commonly owned applications so applicant does not understand why the assumption was made that the applications were not commonly owned. The Examiner is requested to inform applicant if further information concerning these points is needed.

The Examiner also stated: "Additionally, it should be noted that the below double patenting rejections are based upon known and available co-pending applications and although it is believed that all appropriate rejections have been made, Applicant's help in determining all appropriate double patenting rejections with all of Applicant's applications is requested because of the large number of similar applications." (Office Action, 2.) Applicant is uncertain what help the Examiner is requesting. To the extent the Examiner is asking for identification of applicant's co-pending applications, then, as stated above, applicant has attached to the end of this document a list of its patent

applications and its one Taiwanese patent. Additionally, to the extent that applicant is aware of any double patenting issue, applicant will take some action to address or defer the issue, such as by amending or canceling claims, by traversing the rejection, by filing a terminal disclaimer, or by taking some other action. The Examiner is requested to inform applicant if further information concerning this issue is needed.

The Examiner provisionally rejected claims 1-4 under the judicially created doctrine of obviousness-type double patenting in light of various claims from several of applicant's co-pending applications. Those rejections are traversed. Nevertheless, applicant has cancelled claims 1-4 without prejudice in order to present the application in a more favorable condition for allowance, so the rejections of those claims are now moot.

The Examiner provisionally rejected claims 1-15 under the judicially created doctrine of obviousness-type double patenting in light of claims 1-18 of co-pending Application No. 10/052,806. Those rejections are traversed. The rejections of claims 1-4 are moot because, as stated, applicant has cancelled those claims without prejudice. Additionally, applicant has cancelled claims 1-5 and 16-18 in the cited co-pending application without prejudice, so the rejection based on those claims is also moot. There remains only the rejection of claims 5-14 in light of claims 6-15 in the co-pending application, and that rejection should be withdrawn because the co-pending claims do not disclose all the limitations of claims 5-14 in the present application. Specifically, claims 5-14 all require a "retraction assembly is configured to ... urge the pivot arm upward away from the base assembly when the detection system detects the one or more dangerous conditions between a person and the blade," and claim 15 requires

“retraction means ... for urging the pivot arm upward.” Claims 6-15 of the co-pending application fail to disclose or suggest any mechanism to urge the pivot arm upward. Claim 6-14 also include additional limitations not found in the co-pending claims, such as a serrated shaft, a housing, a drive mechanism, a collapsible structure, springs, etc. Therefore, claims 5-15 in the present application are not obvious in light of claims 6-15 in the co-pending application and the double patenting rejections should be withdrawn.

Statement Under 37 CFR 1.78(c)

The Examiner required applicant under 35 USC §103(c) and 37 CFR 1.78(c) to state whether the inventions claimed in the applications cited as the bases for the double patenting rejections were commonly owned at the time the invention claimed in the present application was made. In response, SD3, LLC states that the inventions claimed in the present application and in the co-pending applications cited by the Examiner were commonly owned or subject to an obligation of assignment to SD3, LLC at the time each later invention was made. The undersigned is authorized to make this statement on behalf of SD3, LLC. By making this statement applicant does not concede that the cited claims are conflicting claims or that the double patenting rejections are proper.

Claim Rejections – 35 USC §102(f)

The Examiner rejected claims 1-15 under 35 U.S.C. §102(f) by saying applicant did not invent the claimed subject matter. Specifically, the Examiner said, “It is not clear who actually invented the subject matter of claims 1-15 because each of the above co-pending applications [referring to the co-pending applications cited to support the

double patenting rejections] have different inventive entities.” (Office Action, 12.) This rejection is traversed.

The inventors named in the present application are the inventors of the subject matter claimed in the present application. Multiple individuals are named as inventors because each individual made a contribution to the subject matter of at least one claim of the application, even though each individual may not have made the same type or amount of contribution and even though each individual may not have made a contribution to the subject matter of every claim in the application. Different inventive entities are named in a number of the co-pending applications cited by the Examiner because other individuals made contributions to the subject matter of at least one claim of each such application. The fact that inventive entities may be different in various applications does not mean that inventorship is incorrect in the present application. Often applications with overlapping subject matter but with additional disclosures and differing sets of claims have different inventive entities. That is the situation here. The present application and the co-pending applications cited by the Examiner have disclosures and claims that differ and that require the naming of different inventive entities. Thus, there is no inconsistency in inventorship. Accordingly, applicant requests the rejection under 35 U.S.C. § 102(f) be withdrawn.

Claim Rejections – 35 USC §103

Claims 1-4 and 15 were rejected under 35 USC §103 as obvious over U.S. Patent No. 5,285,708 to Bosten et al. or U.S. Patent No. 5,724,875 to Meredith, in view of U.S. Patent No. 3,785,230 to Lokey and U.S. Patent No. 4,512,224 to Terauchi. These rejections are traversed. Nevertheless, applicant had cancelled claims 1-4 without prejudice in order to allow other claims to issue, so the rejection of those claims is moot. Additionally, applicant has amended claim 15 to require the following:

reaction means for urging the pivot arm away from the base assembly upon detection by the detection system of the one or more dangerous conditions;

where the reaction means includes a brace member and retraction means for gripping the brace member and for urging the pivot arm upward away from the base assembly when the detection system detects the one or more dangerous conditions between a person and the blade; where the brace member is coupled to the tilt mechanism and the retraction means; and where the retraction means is coupled to the pivot arm.

None of the cited references show or suggest these limitations. Therefore, these references cannot by themselves support a conclusion of obviousness. MPEP 2143.03.

New Claims

Applicant has added new claims 16 -24 that depend from claim 5. Those claims should be allowable for the same reasons claim 5 is allowable. Those claims also include additional limitations that distinguish the prior art.

Conclusion

With the entry of the above amendments, and for the reasons discussed herein, Applicant submits that all of the issues raised in the Office action mailed February 6, 2004 have been addressed and overcome. If there are any remaining issues or if the Examiner has any questions, applicant's undersigned attorney can be reached at the number listed below. Similarly, if the Examiner believes that a telephone interview might be productive in advancing prosecution of the present application, the Examiner is invited to contact applicant's undersigned attorney at the number listed below.

Respectfully submitted,

SD3, LLC
